

JULY 2, 2008

FOR IMMEDIATE RELEASE

In-Viro-Drum™ selected by GLOBAL PETROLEUM SHOW to provide precautionary spill recovery services for 2008 Calgary show.

CALGARY, AB: ABCAN, manufacturers of In-Viro-Drum™, participated in the 2008 GLOBAL PETROLEUM SHOW (GPS) in Calgary, Alberta, Canada. GPS organizers contracted ABCAN to provide standby vacuum services as a precautionary measure protecting against possible spills.

In 2008 more that 60,000 registrants from around the world attended the three day conference and trade show event. Equipment demonstrations ranged from operating drilling rigs and compressors to a wide range of service vehicle applications. The latest equipment and technology available in the Oil and Gas industry was showcased by over 2,000 companies. Billions of dollars worth of business was transacted.

GPS organizers contracted ABCAN to provide standby vacuum services as a precautionary measure protecting against possible spills.

The mobility of The In-Viro-Drum™ makes it an ideal solution should spills occur in areas where there are confined spaces and restricted traffic flow. Any liquid, regardless of its viscosity, slurries, powders, or small solid particulates can be quickly “sucked up” by the unit and deposited into container vessels. The hazardous spill management capabilities make the In-Viro-Drum™ an investment that brings an immediate return by reducing or eliminating risk.

ABCAN representatives are currently in discussion about providing services for the next GPS show schedules for June 8 - 10, 2010.
